Abstract

Short abstract.

1 Introduction

Brief context of problem - why clarifying Q's matter. What is the goal. Structure of the paper.

2 Related Work

Existing systems, prior research etc.

3 Methodology

System architecture. What models/algorithms used. How are the questions generated. What inputs/outputs are there.

(Aliannejadi et al., 2019)

4 Evaluation

How did we check the system works. Describe testing process.

5 Results and Discussion

Sample outputs. Summary of system behaviour. What worked well, what didn't? Possible improvements.

6 Conclusion

start here.

Limitations

Required by ACL format, and should be AFTER conclusion. Discuss honest limitations of the work.

Ethics Statement

Required by ACL format. Could just be a sentence or two. Explicit ethics statement on the broader impact of the work, or other ethical considerations.
